2.3.2 – Students mentoring system available in the institution? Give details. (maximum 500 words)

Mentoring has been in existence since time immemorial when human beings have lived in social groups. It has been tried and tested and proved effective in ancient civilizations. In the present educational scenario, it is a process for the informal transmission of knowledge and psychological support relevant to studies, career, personal and professional development. It is relationship based and involves communication over a sustained period of time. Open and assistive communication and trust of both the parties involved are essential for the success of mentoring. The focus is to develop the whole person, the techniques employed are broad and wisdom is required for the appropriate use of mentoring. Techniques may vary according to the situation and the mindset of the mentee, based on which the mentor needs to design a technique tailored to the benefit of the mentee. The benefits include promotion of access and approachability, increase in moral and motivation, discovery of talents, development of leadership qualities, building a desire to learn, fostering of shared values and team work, as well as setting up, striving for and monitoring of targets to achieve. In the institution, mentoring is a wellstructured student support and service system providing confidential, customized, unbiased service and advice on personal, professional and academic matters. The system works as part of the tutorial programme. It is a supportive relationship between a faculty and twenty to thirty students, offering guidance throughout their period of study. Rapport is established between the mentor and the mentee in the first semester itself. The mentor serves as an oncampus guardian, resolving academic conflicts and difficulties, providing an empathetic ear to professional and personal problems and imparting multilevel guidance direction and encouragement. Students with complicated problems and who require professional assistance are directed to 'Darsana', the oncampus, Government – sponsored centre manned by qualified and competent hands.

The college has always maintained a culture that fosters decentralization and participative management. Two such practices that were followed in the academic year 201819 are 1) Curricular Restructuring through Decentralization and Participation 2) Decentralized and Participative Allocation of funds for Academic Non Academic Purpose. I) Curricular Restructuring The award of autonomy has given us considerable freedom to frame curricula and syllabi within the stipulations of the university and state government. As the first step towards restructuring of curricula and syllabi, the departments were given directions to initiate the process by holding discussions with their students to find their suggestions. The faculty of the departments also forwarded their suggestions for change. Feedback was also collected from the stakeholders including the Alumnae, the Employers and the Parents. Inputs from subject experts were also sought. Consolidation of the collected feedback inputs from the stakeholders and experts was done, and the report was placed in the 'Boards of Studies'. Changes and suggestions made by the BOS were incorporated and the approved curricula Syllabi were then presented and ratified by the Academic Council. II) Allocation of funds The institution maintains complete transparency in its financial functions due to the participative and decentralized allocation of funds for various purposes. The financial requirements of the departments and associations for the academic year on the basis of necessary needs are collected prior to the institutional annual budget preparation. This is prepared by the departments Associations was consultation with the students. The consolidated budget is submitted to the Board of Management for approval. Departments are encouraged to apply to various funding agencies for their proposals. In certain cases, some of the necessary expenses for unfunded projects and proposals are taken care of by the management. Finance committee oversees and monitors the funds including those received from sources like the UGC, DST, DBT or any other government or nongovernment agency. Budget is prepared annually on the basic of allocated funds, and funds are

distributed on a need – based manner to all departments and associations. The purchase committee overseas the purchase of equipments and necessary commodities.
