ACADEMIC REPORT

An International Webinar Series on ‘Women in Life science’

Organized by

Department of Zoology

A webinar WILL 2020 on The Joy and Tears of Research was conducted by the Department of Zoology on 22/05/2020 at 9: 20 AM. The chief guest of the day was Dr. Nishana M, Post-Doctoral fellow and associate faculty member at the Department of Pathology, New York University. Welcome note was given by Dr. Gigi Poulouse, HOD, Department of Zoology. The session was inaugurated by Dr. Anis. K. V. Principal, St. Joseph’s College (Autonomous), Irinjalakuda and the life science participants from 14 colleges.

Research conducted for the purpose of contributing towards science by the systematic collection, interpretation and evaluation of data and that, too, in a planned manner is called scientific research: a researcher is the one who conducts this research. The results obtained from a small group through scientific studies are socialized, and new information is revealed with respect to diagnosis, treatment and reliability of applications. The purpose of this review is to provide information about the definition, classification and methodology of scientific research.

The session was started by giving an Introduction about research and steps in Research. She also mentioned about various scholarship exams and also opportunities after research. Women choosing these educational paths and careers face many obstacles, starting with the stereotypes affecting girls and including the prejudice women face when they choose a field of study and the difficulty of combining their career with family responsibilities. Motherhood is one of main obstacles that hold women back in science, and it is hard to admit that. But motherhood should not be an obstacle to a woman’s career development. We still lack policies that would help ensure gender parity and life-work balance, not just for women pursuing careers in science but for women in all areas of work in both the public and the private sector. Women in science asked about the common questions about not sacrificing family when continuing research, being flexible etc. The talk was followed by a doubt clearing session. The session came to an end with the vote of thanks by Dr. Gigi Poulouse. After the same, e-certificates were given to all the participants as well. The session was a great success and lasted for almost 2 hrs.

● REC

How do you feel doing research?

- An endless cycle between excitement and depression...
- An endless cycle between sense of success and failure...
- An endless cycle between over-confidence and self-doubt...
