ACADEMIC REPORT
WEBINAR ON WOMEN IN LIFE SCIENCE

Organized by
Department of Zoology

The primacy of the webinar on women in life science conducted by Department of Zoology was Dr. Ann Rose Bright, who is presently a post doctor fellow at The Max Plank Institute of Neurobiology, Munich Germany. She was a Marie curie doctoral fellow in Radboud University, Netherlands. She was introduced by Dr. Gigi Poulouse Head of the Department, Department of Zoology. The webinar was on 13/02/2021 at 2.30pm.

She is of the view that it is important that the best scientists have the opportunity to pursue a career, and that it is not gender or any other secondary characteristic that determine the chances of success. She dealt with the possibilities of science students for a research oriented future. The path that one should follow to get into a Ph.D. was explained by Dr. Ann. She enthusiastically shared her research experience and interest of hers.

The documents and letters that we would be equipped with while applying for the same were really an informative piece of content within the whole session. Also the importance of patience for the whole process from application to thesis submission was discussed. The session had a good discussion session and it ended with an official thanks giving by Ayana Palakkal, III B.Sc. Zoology.

Let everyone send messages

Plakkiz Squad 4:45 PM
How do you advice someone who's about to start in the field of neurogenomics?

Sojiya Joy 4:46 PM
How you overcome the misconception regarding to going to abroad especially for girls? How you convinced your parents?

Emalda Tomans 4:50 PM
Ma'am, could you please share your opinion on deviating to medical field after Zoology?

Send a message to everyone

Every story is different and will be different.
Making use of the opportunity is the most important factor.
SET YOUR LIMITS HIGH.
